TECHCareers
A MANPOWER PROGRAM

Project Summary

- Non-profit website that features Donation and Shopping for a cause
- The website would have all typical non-profit websites **Static** components like:
  - ❑ Landing page
    - Mission and vision
    - About
    - Get involved
    - Events
    - Contact us form
    - FAQ
- The **Unique Features** where we will demonstrate use of React, Redux and Router would be the Shop-for-Cause feature, in that we will have
  - ❑ **Products list**, which will be fed from fake-shop API
    - Show case the details of the product and its price
    - Add to shopping cart
    - Set of filters by category, price, etc.
    - Sort products by name, price, add date, etc.
  - **Cart**, for the user to manage the order (i.e., change qty., remove items)
  - **Order confirmation**, for the user to checkout the order and pay
    - Registered users with payment methods will proceed to final order confirmation page
    - Non-registered users would go through sequence of forms to fill basic user information and payment information before they head to the order confirmation page
  - ❑ **Donation form**, which simply run the user through sequence of forms to donate to the non-profit organization
- Additional features were considered to show off our React, Redux and Router knowledge however they are in our parking lot to pick from as the project time allows. Those are:
  - Volunteer registration form
  - Volunteer sign in form
  - Volunteer profile
  - Regular user sign up form for newsletter
  - Regular user sing in form
  - Regular user profile
